Petaluma, CA 94954

RE: Transmittal Letter – Updated 2019 NTD Report

Dear Mr. Mansourian:

This letter accompanies our updated SMART NTD counts report which represents three quarters (January 2019 through September 2019) of onboard counts conducted by Corey, Canapary & Galanis. Note that this report has been updated from prior versions. Some of the data are for informational purposes only and should not be used for any projections for these time periods. Only the full data set figures (January 2019 – September 2019) are projectable.

We recommend SMART staff use this report as one resource in the development of system performance data metrics.

As you know, we are currently conducting additional quarterly counts on SMART trains through 2020. Please note that the 2020 report will reflect a time period of July 2019 through June 2020 to be consistent with state reporting requirements. Any subsequent NTD reports will continue to include the state required time period (July through June).

Sincerely,

Jon Canapary

SMART NTD Counts

January – September 2019

Final Report
(Revised 12-20-19)

Table of Contents

Background

Section 1: Passenger Boardings/Passenger Miles Summary

(Total, by Train Type, and By Train Counted) – This is the passenger boardings and passenger miles for 2019, based on the counts through the entire year.

Section 2: Northbound Ridecheck Count Detail – These tables show the northbound trains counted for 2019.

Section 3: Southbound Ridecheck Count Detail – These tables show the southbound trains counted for 2019.

Appendix:

Fieldwork / Data Cleaning Information
Count Forms

Background

Corey, Canapary & Galanis (CC&G) conducted this study on behalf of the Sonoma-Marín Rail Transit (SMART) to fulfill federally mandated on-board passenger count requirements of the National Transit Database (NTD).

The project consisted of the following primary tasks managed by CC&G:

-) Planning, scheduling, and preparing for the counts on SMART trains.
-) Training staff on the specifics of this count project.
-) Scheduling and conducting shifts throughout the year.
-) Conducting the 2019 counts across four time periods of approximately 2 ¼ months months each.
-) Entering the completed count sheets into an Excel spreadsheet.
-) Providing projected SMART ridership within this management report.

The approach on this project is outlined below:

-) CC&G randomly selected train cars to be counted as per NTD compliant count procedures.
-) CC&G staff boarded SMART trains and conducted counts at each station or stop on the SMART system. CC&G starting at one end (e.g. San Rafael) and conducted end-to-end counts for each randomly selected train car.
-) Counts were conducted on both weekday and weekend trains.
-) CC&G used the NTD Sampling Template to determine how many randomly selected train cars were scheduled for counts in 2019. A minimum of 92 train car counts were required in 2019.

Schedule

Corey, Canapary & Galanis conducted the NTD counts beginning in January 2019 and ending in September 2019. The schedule was divided into four time periods:

- Period 1: January 1 - March 9, 2019
- Period 2: March 10 - May 16, 2019
- Period 3: May 17 - July 24, 2019
- Period 4: July 25 - September 30, 2019.

Subsequent SMART NTD counts will cover a full 12-month period. For 2019, the January 1, 2019 start date was the soonest CC&G could begin the counts.

Other

The data tables included as Section 1, 2 and 3 in this report will also be sent to SMART as Excel files.

Section 1: Passenger Boardings/Passenger Miles Summary (Total, by Train Type, and By Train Counted)

Fiscal Year 2019 NTD Ridechecks (Partial Year Survey January-September 2019)

Cumulative Total Passenger Boardings

	#Cars Jan-Sep 2019	Boardings Jan-Sep 2019	Percentage of Total	# of SVC Days	Boardings Per Day
TOTAL	14,628	455,240			
Weekday	12,988	389,640	85.59%	191	2,040
Weekend	1,640	65,600	14.41%	82	800

Fiscal Year 2019 NTD Ridechecks (Partial Year Survey January-September 2019)

Cumulative Total Passenger Miles

	#Cars Jan-Sep 2019	Passenger Miles Jan-Sep 2019	Percentage of Total	# of SVC Days	Miles Per Day
TOTAL	14,628	9,212,380			
Weekday	12,988	7,857,740	85.30%	191	41,140
Weekend	1,640	1,354,640	14.70%	82	16,520

Data is accurate +/- 10% with 95% confidence

FIELDWORK

In accordance with NTD (National Transit Database, www.ntdprogram.gov) standards, a number of trains were randomly selected for counts every quarter. On each day of the fieldwork, surveyors were assigned a specific car on one of the randomly selected trains to survey during their shift. In order to simplify car assignment, the first car in the direction of travel was always numbered as Car 1. In order to maximize efficiency, sampled trains were paired with a train returning in the opposite direction. This normally allowed a surveyor to travel out on one and return on the next. When pairs were scheduled where a surveyor could not travel out on the first train and return on the next, the trains were assigned for subsequent days.

Upon arriving at the designated car, surveyors boarded the train and began recording data. While the surveyors' primary task was the recording of the number of passengers boarding and alighting from their car at each station, they also recorded both the total number of passengers in their car and the departure time at each station. Only one car on one train was counted at a time, and only one surveyor was used on each train. Surveyors rode their assigned train between San Rafael and Santa Rosa North. Passengers onboard at Santa Rosa North were assumed to have boarded or alighted at Sonoma County Airport..

Interviewers returned completed data sheets to the CC&G office within two days of the run. Inputting and data cleaning was done as soon as the data sheets were returned. Standard office procedures were used in spot checking (validating) the work of the data inputters and cleaners.

DATA CLEANING

Note that the number of alighting passengers and boarding passengers in the surveyed car is not always equal due to passenger movement between cars. Fieldworkers recorded these counts "as is" and were instructed not to attempt to balance these figures. These numbers were balanced once the data was entered. Stations were identified where the numbers did not balance. It was assumed that passengers in the car alighted, either at the surveyed car or another, and the number alighting was adjusted to balance the equation. For the majority of cases, this adjustment balanced the equation. Only in the few cases where it didn't, was the number boarding adjusted.

DETAIL SHEET CODES

Date	The date the data was acquired
Departure	The departure time of the train on which the data was acquired
Day	The day of the week of the run. M = Monday, TU = Tuesday, W = Wednesday, TH = Thursday, F = Friday, SA=Saturday, SU = Sunday
Car	The position of the car surveyed. Car #1 is always the first car in the direction of travel
Stop ID	A sequential number identifying the station
Location	The station name with a descriptor (NB/SB) for the direction of the train
Dir	The direction of the train
Stop	Whether the train stops at this station.
Off	The number of passengers alighting at that station
On	The number of passengers boarding at that station
Pass Load	The number of passengers at that station. It is the load at the previous station + the number of passengers boarding at the current station - the number of passengers alighting at the current station.
Distance	The distance (in miles) between the current and the previous station
Pass MIs	Passenger Miles. It is Pass Load multiplied by distance.

NORTHBOUND - SMART NTD COUNTS

Surveyor _____ Car# _____ OF _____ Date _____

Day (CHECK ONE): Mon Tue Wed Thur Fri Sat Sun

SCHEDULED TRAIN DEPARTURE _____:_____ am/pm On time Early _____ (#mins) Late _____ (#mins)

SCHEDULED TRAIN ARRIVAL _____:_____ am/pm On time Early _____ (#mins) Late _____ (#mins)

STATION					CAR SPECIFIC INFORMATION	
Station	Stopped at station?	# OFF	# ON	Total # On Car	Notes (Use Back For Additional Notes)	Departure Time (Arrival time at Last Station) (HH:MM)
